#### **General Description**

These devices contain six independent drivers, each of which performs the logic NOR function. Each driver has increased output drive capability to allow the driving of high capacitive loads.

#### Features

- Switching specifications at 50 pF
- Switching specifications guaranteed over full temperature and V<sub>CC</sub> range
- Advanced oxide-isolated, ion-implanted Schottky TTL process
- Functionally and pin for pin compatible with advanced low power Schottky TTL counterpart

Note 1: The "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated at these limits. The parametric values defined in the Electrical Characteristics tables are not guaranteed at the absolute maximum ratings. The "Recommended Operating Conditions" table will define the conditions for actual device operation.
