

# 0.37 $\Omega$ , Low Capacitance, Dual DPDT / Quad SPDT Analog Switch

## DESCRIPTION

The DG2788A, is a four-channel single-pole double-throw (SPDT) analog switch with two control inputs. It is also known as a two-channel double-pole double-throw (DPDT) configuration. The part is designed to operate from 1.8 V to 5.5 V single power rail. All switches conduct equally well in both directions, offering rail to rail signal switching and can be used both as multiplexers as well as de-multiplexers.

The DG2788A offers low parasitic capacitance and highly matched low and flat switch resistance over the full signal range. It features break-before-make switching and low control logic threshold. The part supports rail to rail fast edge pulsing signals and have 0.1 ns/typ. propagation delay. It is ideal for both analog and digital signal switching in space constrain applications requiring high performance and efficient use of board space.

The DG2788A comes in a small miniQFN-16 lead package of 2.6 mm x 1.8 mm x 0.55 mm.

## FEATURES

- 1.8 V to 5.5 V single supply operation
- Low resistance: 0.37  $\Omega$ /typ. at 2.7 V
- Highly flat and matched  $R_{ON}$
- Low parasitic capacitance,  $C_{ON} = 26$  pF,  $C_{OFF} = 14.5$  pF
- High bandwidth: 338 MHz
- 0.1 ns/typ. propagation delay for rail to rail fast edge pulsing signal
- Guaranteed logic high 1.2 V, logic low 0.3 V
- Break before make switching
- Signal swing over  $V_+$  capable
- Power down protection
- Latch up current: 300 mA (JESD78)
- ESD / HBM: > 2 kV
- Material categorization: for definitions of compliance please see [www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

**RoHS**  
COMPLIANT

## BENEFITS

- Low and flat resistance
- Excellent total harmonic distortion
- Low parasitic capacitance
- Low voltage control interface

## APPLICATIONS

- Analog and digital signal switching
- SMA optical image stabilization
- Relay replacement
- Portable instrumentation
- Smart phones and tablets
- Modems and peripherals
- Data storage

## FUNCTIONAL BLOCK DIAGRAM AND PIN CONFIGURATION

TRUTH TABLE		
LOGIC	NC1, 2, 3 and 4	NO1, 2, 3 and 4
0	On	Off
1	Off	On

**ORDERING INFORMATION**

TEMPERATURE RANGE	PACKAGE	PART NUMBER	MIN. ORDER / PACK. QUANTITY
-40 °C to +85 °C lead (Pb)-free	miniQFN-16	DG2788ADN-T1-GE4	Tape and reel, 3000 units

**ABSOLUTE MAXIMUM RATINGS** ( $T_A = 25\text{ °C}$ , unless otherwise noted)

PARAMETER	SYMBOL	LIMIT	UNIT
Reference to GND	V+	-0.3 to +6	V
	IN, COM, NC, NO <sup>a</sup>	-0.3 to (V+ + 0.3)	
Current (any terminal except NO, NC, or COM)		30	mA
Continuous current (NO, NC, or COM)		± 300	
Peak current (pulsed at 1 ms, 10 % duty cycle)		± 500	
Storage temperature (D suffix)		-65 to +150	°C
Package solder reflow conditions <sup>d</sup>	miniQFN-16	250	
Power dissipation (packages) <sup>b</sup>	miniQFN-16 <sup>c</sup>	525	mW

**Notes**

- Signals on NC, NO, or COM, or IN exceeding V+ will be clamped by internal diodes. Limit forward diode current to maximum current ratings
- All leads welded or soldered to PC board
- Derate 6.6 mW/°C above 70 °C
- Manual soldering with iron is not recommended for leadless components. The miniQFN-16 is a leadless package. The end of the lead terminal is exposed copper (not plated) as a result of the singulation process in manufacturing. A solder fillet at the exposed copper lip cannot be guaranteed and is not required to ensure adequate bottom side solder interconnection

SPECIFICATIONS (V+ = 3 V)

**Notes**

- a. Room = 25 °C, full = as determined by the operating suffix  
b. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this data sheet  
c. Typical values are for design aid only, not guaranteed nor subject to production testing  
d. Guarantee by design, not subjected to production test  
e. V<sub>IN</sub> = input voltage to perform proper function  
f. Crosstalk measured between channels

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

**TYPICAL CHARACTERISTICS** ( $T_A = 25^\circ\text{C}$ , unless otherwise noted)

### Notes

- (1) Use millimeters as the primary measurement.
- (2) Dimensioning and tolerances conform to ASME Y14.5M. - 1994.
- (3) N is the number of terminals. Nd and Ne is the number of terminals in each D and E site respectively.
- (4) Dimensions b applies to plated terminal and is measured between 0.15 mm and 0.30 mm from terminal tip.
- (5) The pin 1 identifier must be existed on the top surface of the package by using identification mark or other feature of package body.
- (6) Package warpage max. 0.05 mm.

ECN: T16-0226-Rev. B, 09-May-16  
DWG: 6023

## RECOMMENDED MINIMUM PADS FOR MINI QFN 16L

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
