

DCNLJ Series

60V and 110V MAX High-Current High-Voltage DC Contactor Relays

DCNLJ250PD12

DCNLJ125PD60

Description

The DCNLJ Series Max High-Current High-Voltage DC Contactor Relay is designed for high-current contact switching in electric control systems of communication power supplies and uninterruptible power supplies (UPS) as well as other industrial and vehicle applications.

This normally open relay comes in a variety of configurations to suit your application requirements. Polarized models with main contacts rated for 96V (110V max) and non-polarized models with main contacts rated for 48V (60V max) are available with a continuous current rating of 125A, 200A, or 250A.

Available coil options for the DCNLJ contactor relay vary depending on the model's continuous current rating and include 12V, 24V, 48V, and 60V.

Specifications

Max Voltage Rating (V DC):	60, 110
Current Rating Continuous (A):	125, 200, 250
Coil Voltage Rating (V DC):	12, 60
Ingress Protection:	IP 40
Operating Temperature (°C):	-40 to +85

Applications

- Communication Power Supplies
- UPS
- Material Handling
- Industrial Machinery

Features and Benefits

- Available with a 125A, 200A, or 250A continuous current rating for high-current contact switching
- Main contacts rated for 48V typical (60V max) or 96V typical (110V max)
- 48V units have non-polarized magnets and 96V units have polarized magnets
- Single-pole, single-throw (SPST), normally open contact arrangement
- Coil rating options include 12V, 24V, 48V, and 60V (availability varies with the unit's continuous current rating)
- Robust standard industrial footprint

Application Notes & Definitions

- Be sure to use a washer to prevent screws from loosening. Tighten the screw so that the torque is in the range specified below. Exceeding the maximum torque can lead to product rupture.

PRODUCT SERIES	PRODUCT MODEL	CONTACT TERMINAL		COIL TERMINAL		MOUNTING	
		HOLE OR BOLT	REFERENCE TORQUE	HOLE/BOLT/WIRE/TERMINAL	REFERENCE TORQUE	REFERENCE BOLT SIZE	REFERENCE TORQUE
DCNLJ125	DCNLJ125NB12	Bolt : M8	7N.m~10N.m	6.3mm (0.25") tab style terminal	/	M4	1.5~1.8N.m
	DCNLJ125NB24						
	DCNLJ125NB60

	DCNLJ200NB60						
DCNLJ250	DCNLJ250PD12	Bolt : M10	9~11N.m	TE Connector # 1-178128-2	/	M8	12~15N.m
	DCNLJ250NB12-01			TE Connector # 1-178128-3			

- Please refer to the drawing for connection polarity.
- Do not use dropped products.
- Avoid installing the product in a strong magnetic field (Close to the transformer or magnet), or near an object with heat radiation.
- Electrical life
Please use under load capability and life cycle so as not to cause a function failure. (Please also treat the contactor as a product with specified life and replace it when necessary). It is possible to make parts burn around the contactor once operating failure happens. So it is necessary to take layout into account to make sure power shall be cut off within 1 second.
- Do not let particle and oil stain on the main terminal with which the load shall make a reliable contact or it will cause a lot of heat.
