

Cell-phone TRRS Headset – Earbud Headphones w/ Microphone

Product ID: 1966

Description

These earbud headphones are the perfect accessory for your FONA – they've been tested to work with our modules – but can be used with any iOS or Android

device that uses a TRRS pinout. The buds themselves are 16mm in diameter with a nice 40" long. They come with a standard 4-pole TRRS headphone jack and have a small microphone for phone calls.

We may change the model up but for now they are 'OEM' Apple-looking brand in black.
