## REFLOW SOLDERING

- The ChipLED is rated as a MSL3 as general request product.
- The recommended floor life out of bag is 24hrs.
- The temperature profile is as below.

IPC/JEDEC J-STD-020C

Profile Feature	Pb-Free Assembly
Average ramp-up rate(Tsmax to Tp)	3°C/second max.
Preheat	
- Temperature Min(Tsmin)	150°C
- Temperature Max(Tsmax)	200°C
- Time(Tsmin to Tsmax)	60-180 seconds
Time maintained above	
- Temperature(T <sub>L</sub> )	217°C
- Time(T <sub>L</sub> )	60-150 seconds
Peak Temperature(Tp)	260°C
Time within 5°C of actual peak Temperature(tp) <sup>2</sup>	20-40 seconds
Ramp-down Rate	6°C/second max.
Time 25°C to peak Temperature	8 minutes max.

## Moisture Sensitivity

- Yongyu recommends keeping ChipLEDs in the provided, resealable moisture-barrier packaging (MBP) until immediately prior to soldering. Unopened MBPs that contain ChipLEDs do not need special storage for moisture sensitivity.
- Once the MBP is opened, ChipLEDs may be stored as MSL 3 per IPC/JEDEC J-STD-020C, meaning they have one year of floor life in conditions of  $\leq 30^{\circ}\text{C}/60\%$  relative humidity (RH). Regardless of the storage condition, Yongyu LED recommends sealing any unsoldered ChipLEDs in the original MBP.

## Handling

- The packaging sizes of these SMD products are very small. Users are required to handle with care.
- To avoid damaging the product's surface and interior device, it is recommended to choose a special nozzle to pick up the SMD products during the process of SMT production. If handling is necessary, take special care when picking up these products.

## Repairing

Repair should not be recommended after SMT production. When repairing is needed, a double-head soldering iron should be used (as below figure). It should be assured before handing whether the electrical and optical characteristics of the LEDs will or will not be damaged by repairing.

## PACKING

- The LEDs are packed in cardboard boxes after packaging in normal or anti-electrostatic bags.
- Cardboard boxes will be used to protect the LEDs from mechanical shock during transportation.
- The boxes are not water resistant, and they must be kept away from water and moisture.
- The reel pack is applied in SMD LED.
- 3000pcs per reel.
