680W Single Output Programmable LED Driver

#### Features

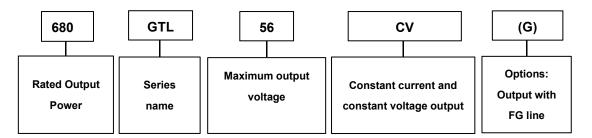

- Dimming port programming without driver power on
- CC/CV hybrid output
- High efficiency (Max 95%), active power factor correction
- Ultra low THD at light load
- Isolated 0~10V/ PWM/Rset dimming, Dim to off option
- 12V/200mA AUX Output
- UL listed with Class P
- IP65

#### Description

680W LED Drivers offers digital programmable drivers with wide-range adjustable output current, together with 12V/200mA auxiliary output (optional) for smart lighting.

The output current of this series are programmable, and designed for 0-10V/PWM/Rset dimming applications.

#### **Model Name Definition**

#### **Specifications**

| Part Number    | Max. Output<br>Power | Programmable Current<br>Region@CC | Output Voltage<br>Range | Programmable<br>Voltage<br>Region@CV | Efficiency<br>@277VAC |
|----------------|----------------------|-----------------------------------|-------------------------|--------------------------------------|-----------------------|
| 680GTL48CV(G)  | 680W                 | 6.48-16.19A                       | 25-48V                  | 42-48 V                              | 95%                   |
