## Protection

Over Current	The green mode power supply shall be hiccupped when any output operating in overload Condition (set@ Max load 110%~200%) under any line condition indefinitely. Will self-recover when the fault condition is removed.
Short Circuit	The power supply shall be hiccupped, and no damage shall occur when any output operates in a short circuit condition under any line condition indefinitely. Will self-recover when the fault condition is removed.

## Environmental Conditions

	Operating	Non-Operating
Ambient Temp	-10~+40°C	-20~+60°C
Relative Humidity	10~90%	10~90%
Vibration	1.0mm, 10 ~ 25Hz, 15min. /1 cycle for each axis along X, Y,Z	The power supply shall be designed to withstand normal transportation vibration per MIL-STD-810D, method 514 and procedures X, as it's mounted in the chassis assembly and packed for shipping.
Cooling	The power supply will operate with convection cooling. Blocking of vents must not cause damage to the power supply	

## Reliability

MTBF	The predicted and demonstrated MTBF must exceed 50K hours at 25° C.
Burn-In	The power supply shall undergo a minimum of 4 hours Burn-In test under full load at 40°C ~ ±5°C
Component Derating	Semiconductor junction temperatures shall not exceed the manufacturer's maximum thermal rating
