

5kW Fan cooled

The HPT5KO-L series offers ultimate flexibility with both output voltage and output current programming and user defined signals, warnings and alarms. Programming is via voltage, I<sup>2</sup>C PMBus, RS485 and CANopen in a very high efficiency, high power density 5kW chassis mount package. The HPT-L can be used in both constant voltage and constant current operation.

Measuring just 13.25" x 10.00" x 2.50" the HPT5K0-L also features active current sharing, remote on/off, remote sense and a power OK signal. The standby output is available whenever the mains supply is present.

#### **Features**

- ▶ 3 phase 180 to 528VAC input 3 wire and earth
- ► High efficiency up to 94%
- ► Programmable output voltage (0-105%)
- ► Programmable output current (0-110%)
- ▶ Parallel operation
- ► Analog and digital interfaces
- ► Multiple digital protocols PMBus, CANopen, MODBUS and SCPI
- ► Fully featured signals and controls
- ► 5V/2A standby output
- ► Graphical user interface (GUI)
- ▶ 3 year warranty

#### **Applications**

Industrial Electronics

Technology

## **Dimensions**

336.5 x 254.0 x 63.5 mm (13.25 x 10.00 x 2.50 in)

#### Notes:

- 1. Measured with 480VAC input and full load.
- 2. Standard models include PMBus, CANopen and RS485 interfaces. RS485 default is full duplex. RS485 half duplex can be configured via I<sup>2</sup>C or factory configured on request.
- 3. 48V output classified as ES1 and PS3 for IEC/EN62368-1.

## Input

| Characteristic        | Minimum                              | Typical                             | Maximum | Units | Notes & conditions                     |  |  |
|-----------------------|--------------------------------------|-------------------------------------|---------|-------|--|--|--|

| Overtemperature protection | Auto resettin | g thermal prote | ection             |                 |   |
| Overload protection        |               |                 | ±3                 | % of max load   | Set current limit point. Constant current characteristics. Max current limit is 108% ±3% of maximum rated current. For low line (180-264VAC), constant power characteristic set at 3.4W until current limit point is reached. 5V Standby: <5A max |
| Temperature coefficient    |               |                 | 0.03               | %/°C            | Of maximum load   |
| Short circuit protection   | Constant cur  | rent characteri | stics. 5V Standb   | y: Foldback ch  | aracteristic < 5A max.  |
| Remote sense               | Compensate    | s for 1% max c  | of nominal voltage | ge per lead, 2% | of total nominal voltage drop. Not fitted on HPT5K0TS200-L.   |

### General

| Characteristic             | Minimum  | Typical    | Maximum   | Units   | Notes & conditions                                     |
|----------------------------|--|------------|---|---------|--|
| Efficiency                 | 92   | 93         |   | %       | Measured from 342 to 528 VAC, 5V Standby at full load. |
| Isolation: Input to output | 6000 <sup>(1)</sup>  |            |   | VDC     |  |
| Input to ground            | 4000 <sup>(1)</sup>  |            |   | VDC     |  |
| Output to ground           | 500  |            |   | VDC     |  |
| Switching frequency        | 55   | 60         | 65  | kHz     | Fixed frequency PFC                                    |
|                            | 40   |            | 250   | kHz     | Variable frequency main converter                      |
| Power density              |  |            | 15.38   | W/in³   |  |
| Signals and controls       | ind controls V Program, I Program, AC OK, DC OK, Fan Fail/Temperature Warning, Sync, PMBus, Inhibit, |            | e Warning, Sync, PMBus, Inhibit, Current Share. |         |  |
| MTBF                       |  | 600        |   | kHrs    | Telecordia 332   |
| Weight                     |  | 12.5 (5.7) |   | lb (kg) |  |

<sup>1.</sup> Rating for complete assembly with HI-POT screw removed (see mechanical details for screw position). Maximum isolation test voltage is 2121VDC with screw installed.

#### **Environmental**

| Characteristic            | Minimum       | Typical  | Maximum | Units | Notes & conditions                                    |  |  |
|---------------------------|---------------|--|---------|-------|---|--|--|
| Operating temperature     | -20           |  | 70      | °C    | Derate linearly from 50°C to 50% rated power at 70 °C |  |  |
| Storage temperature       | -40           |  | +85     | °C    |   |  |  |
| Cooling                   |               |  |         |       | Force-cooled with intelligent fan speed control       |  |  |
| Humidity                  | 5             |  | 95      | %RH   | Non-condensing  |  |  |
| On a reating a plainted a |               |  | 3000    |       | Medical   |  |  |
| Operating altitude        |               |  | 5000    | m m   | ITE   |  |  |
| Transport altitude        |               |  | 10000   | m     |   |  |  |
| Shock                     | ±3 x 30 g sh  | ±3 x 30 g shocks in each plane, total 18 shocks. 30 g = 11 ms (±0.5 ms) half sine. Conforms to EN60068-2-27 & EN60068-2-47 |         |       |   |  |  |
| Vibration                 | Single axis 1 | Single axis 10-500 Hz at 2 g sweep and endurance at resonance in all 3 planes. Conforms to EN60068-2-6                     |         |       |   |  |  |
| Acoustic noise            | < 70db(A) Lv  | /  |         |       |   |  |  |

## Signals & controls

|                             | Function   |
|-----------------------------|--|
| V Program <sup>(1)(2)</sup> | 0V to 5V signal will program Vout from 0-105%. VProg accurancy ±1% of nominal output voltage. When left open, supply will go into its default operating mode.  |
| I Program <sup>(1)(2)</sup> | 0V to 5V signal will program the current limit from 0-110%. When this signal is left open, supply will go into its default operating mode. IProg accurancy ±2% of maximum rating.  |
| AC OK                       | LOW = Input Voltage is within operating range, HIGH = Input Voltage is outside of operating range or there is a loss of phase.  Uncommitted opto-transistor, 2 ms warning time   |
| DC OK                       | When the supply is used as a variable output supply, this signal is disabled. When the supply is programmed as a fixed output supply, LOW = Vout > 95% of Vnominal. This level is programmable by the user through the PMBus. Uncommitted opto-transistor  |
| Fan Fail/Temp Warning       | High = Fan FAIL and/or overtemperature, Low = Fan OK and temperature OK (3.3V Logic), unit switches off 10 s after Fan Fail/Temp Warning alarm, auto recovery. XP GUI available for download, contact sales.   |
| Sync.                       | Connect parallel units to synchronise output turn on.  |
| PMBus, CANopen and RS485    | Operation of the product using the Fieldbus interfaces and associated protocols is defined in the supporting document 'HPT5K0/ HPL5K0 Communication, Control and Status Specification'. Installation and use of the XP PS Manager software (graphical user interface) is defined in the supporting document 'XP PS Manager User Manual'. These documents are available through our website. Analogue to digital monitoring accuracy: Vout monitor accuracy ±1% of nominal voltage. lout monitor accuracy ±2% of full load. Vout & lout setting accuracy are ±1% & ±2% respectively |
| Current Share               | Connecting pin 23 on one unit to pin 23 on a like voltage unit will force the current to be shared. Up to 5 units can be paralleled. Curren share accuracy ±3% of full load of single unit.  |
| Inhibit                     | Uncommitted opto diode. See Signals & controls.  |

<sup>(1)</sup> In analog mode, the default Vout and lout settings are 0% when open circuit.

<sup>(2)</sup> To activate analog mode, PMBus\_EN (pin 24) must be pulled down to SGND or 5VSBY return. Default when open is digital programming.

## **EMC:** emissions

| Phenomenon        | Standard        | Test Level | Notes & conditions |
|-------------------|-----------------|------------|--------------------|
| Conducted         | EN55011/EN55032 | Class B    |                    |
| Radiated          | EN55011/EN55032 | Class A    |                    |
| Harmonic currents | EN61000-3-2     | Class A    |                    |

| 16  | I <sup>2</sup> C SCL  | I <sup>2</sup> C Bus Clock (10kΩ pull up to 3.3V)  |  |  |  |  |  |
| 17  | FAN_FAIL/TEMP WARNING | Fan Failure/Temp Warning Reporting (High means fan fails and/or overtemperature rating; 10kΩ pull up to 3.3V)                  |  |  |  |  |  |
| 18  | SYNC                  | Connect parallel units to synchronise output turn on   |  |  |  |  |  |
| 19  | VPROG                 | 0 - 5V to set Vout from 0 to 105% $^{(1)}$ (50.8 k $\Omega$ discharge resistor to SGND (2))                                    |  |  |  |  |  |
| 20  | RS+                   | Postive Remote Sense (HPT5K0TS060 & HPT5K0TS100 only)  |  |  |  |  |  |
| 21  | RS-                   | Negative Remote Sense (HPT5K0TS060 & HPT5K0TS100 only)   |  |  |  |  |  |
| 22  | IPROG                 | 0 - 5V to set Current Limit from 0 - 110% of rated current <sup>(1)</sup> (50.8 kΩ discharge resistor to SGND <sup>(2)</sup> ) |  |  |  |  |  |
| 23  | ISHARE                | 0 - 2.6V for current sharing of units in parallel  |  |  |  |  |  |
| 24  | PMBUS_EN              | Selecting Digital (open) or Analog (low) mode for VPROG & IPROG (10kΩ pull up to 3.3V)   |  |  |  |  |  |
| 25  | ACOK                  | Low means AC is within range operating range (Opto Isolated; Open Collector)   |  |  |  |  |  |
| 26  | ACOK return           | Return for ACOK (Opto isolated)  |  |  |  |  |  |
| 27  | 5VSBY                 | 5V/2A Standby  |  |  |  |  |  |
| 28  | 5VSBY                 | 5V/2A Standby  |  |  |  |  |  |
| 29  | 5VSBY_RTN             | 5V/2A Standby Return   |  |  |  |  |  |
| 30  | 5VSBY_RTN             | 5V/2A Standby Return   |  |  |  |  |  |

#### Notes

- 1. In analog mode, the default Vout & lout settings are 0% when Vprog & lprog are open circuit.
- 2. To activate analog mode, PMBus\_EN must be pulled down to SGND or 5VSBY return. Default if left open is digital programming.

### Signals & controls

#### AC OK

#### Fan fail/Temperature warning

#### Inhibit

#### **Current share**

Up to 5 x HPT5K0 units

To synchronise output turn on from application of AC input, connect SYNC (pin 18) of parallel units together.

#### Notes:

- 1. In case of fan failure, and/or Overtemperature, FAN\_FAIL/Temp Warning signal will be set 10s before output shutdown.
- 2. Don't care / not applicable.
- 3. DC\_OK LED is ON if Output Voltage >= VOUT\_UV\_FAULT\_LIMIT, if Output Voltage < VOUT\_UV\_FAULT\_LIMIT, the DC\_OK LED will be OFF

#### Mechanical details

#### Notes:

- 1. All dimensions are in inches (mm).
- 2. Weight 5.7kg (12.5lb)

3. Signal Connector: P/N JST S30B-PHDSS (LF) (SN) or equivalent Mates with P/N JST PHDR-30VS or equivalent
