| fastening method                                                                                                   | Surface mounting and installation    |
| type of electrical connection for supply voltage line-side                                                         | Box lug                              |
| tightening torque [lbf-in] for supply                                                                              | 120 ... 120 lbf-in                   |
| type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded                  | 1x (14 ... 1/0 AWG)                  |
| temperature of the conductor for supply maximum permissible                                                        | 75 °C                                |
| material of the conductor for supply                                                                               | AL or CU                             |
| type of electrical connection for load-side outgoing feeder                                                        | Box lug                              |
| tightening torque [lbf-in] for load-side outgoing feeder                                                           | 45 ... 45 lbf-in                     |
| type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded | 1x (14 ... 2 AWG)                    |
| temperature of the conductor for load-side outgoing feeder maximum permissible                                     | 75 °C                                |
| material of the conductor for load-side outgoing feeder                                                            | AL or CU                             |
| type of electrical connection of magnet coil                                                                       | Screw-type terminals                 |
| tightening torque [lbf-in] at magnet coil                                                                          | 5 ... 12 lbf-in                      |
| type of connectable conductor cross-sections of magnet coil for AWG cables single or multi-stranded                | 2x (16 ... 12 AWG)                   |
| temperature of the conductor at magnet coil maximum permissible                                                    | 75 °C                                |
| material of the conductor at magnet coil                                                                           | CU                                   |
| type of electrical connection at contactor for auxiliary contacts                                                  | Screw-type terminals                 |

|                                                                                                                               |                                                     |
|-------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| tightening torque [lbf-in] at contactor for auxiliary contacts                                                                | 10 ... 15 lbf-in                                    |
| type of connectable conductor cross-sections at contactor for AWG cables for auxiliary contacts single or multi-stranded      | 1x (12 AWG), 2x (16 ... 14 AWG), 2x (18 ... 16 AWG) |
| temperature of the conductor at contactor for auxiliary contacts maximum permissible                                          | 75 °C                                               |
| material of the conductor at contactor for auxiliary contacts                                                                 | CU                                                  |
| type of electrical connection at overload relay for auxiliary contacts                                                        | Screw-type terminals                                |
| tightening torque [lbf-in] at overload relay for auxiliary contacts                                                           | 7 ... 10 lbf-in                                     |
| type of connectable conductor cross-sections at overload relay for AWG cables for auxiliary contacts single or multi-stranded | 2x (20 ... 14 AWG)                                  |
| temperature of the conductor at overload relay for auxiliary contacts maximum permissible                                     | 75 °C                                               |
| material of the conductor at overload relay for auxiliary contacts                                                            | CU                                                  |

#### Short-circuit current rating

|                                                                                   |                                                     |
|-----------------------------------------------------------------------------------|-----------------------------------------------------|
| design of the fuse link for short-circuit protection of the main circuit required | 10kA@600V (Class H or K); 100kA@600V (Class R or J) |
| certificate of suitability                                                        | NEMA ICS 2; UL 508; CSA 22.2, No.14                 |
