## STANDARD FEATURES

<b>Variable Speed Motors</b>	Variable speed compressor and condensing fans for quiet operation and improved energy efficiency.
<b>Semi-Closed Fluid System</b>	Sealed fluid system with breathable reservoir cap (similar to an automobile). This prevents evaporative losses, introduction of bacteria, and the need for components to prevent fluid from draining back into the system when installed below the application.
<b>Optical Fluid Level Switch</b>	Fluid level sensing with no moving parts.
<b>RS-232 Communications</b>	Complete control integration of chiller into higher level assembly control system.
<b>Supply Pressure Sensing</b>	Pressure sensing for applications sensitive to high operating conditions.

## ACCESSORY KITS

Feature	Kit Part Number	Description
<b>Flow Control Valve and Flow Sensing Kit</b>	<b>387004277</b>	Externally installed valve for reducing the overall flow to the application. Full flow continues through the chiller to maintain high heat transfer rates and temperature stability. Flow meter for measuring coolant flow rate. Installed external to the chiller with both a local display and connectivity to chiller LCD display.
<b>Water Filter Kit</b>	<b>387004279</b>	Hot swappable, 5-micron water filter for filtering particulates from the coolant circuit.
