

E0716

Discover the Elpress E0716 Hand Tool – Precision, Flexibility, and Reliability in every crimp.

Equip your toolkit with the Elpress E0716, a hand tool designed to deliver great crimping performance. Certified and tested, this tool is your go-to for crimping KRF/KSF and DIN Cu-terminal ranging from 0.75 to 16 mm²/AWG 18-6, accommodating both European metric and US AWG range lugs with ease.

- **Versatility for All Users:** Whether you're left or right-handed, the Elpress E0716 ensures comfortable and effective operation.
- **Scissor Movement:** This feature provides optimal access in tight spaces, making it ideal for intricate work where precision is important.
- **Secure Crimping:** Equipped with a locking function, the tool guarantees that it only releases once a full crimp cycle is complete.
- **Safety First:** An emergency release feature allows for the interruption of the crimping process if necessary, adding an extra layer of safety during operation.
- **Long-Term Reliability:** With the possibility for adjustment and recalibration after extensive use, this tool promises longevity and consistent performance.
