Care and Construction Powder-Coated Aluminum

Material Characteristics

Designed for Long-Term, Heavy-Duty Applications

Our powder-coated aluminum dispensers resist corrosion, chips and flaking. This material will provide long-lasting products that hold up well in tough environments.

Powder-coated aluminum is ideal for dispensers used in a healthcare or an industrial setting. It is impact resistant and is not effected by extremes in temperature.

Care and Cleaning

The semi-gloss powder-coated finish resists mild chemicals and cleaning agents, such as Windex or glass cleaners. It should be cleaned with a damp cloth or mild soap and water. Scotch-Brite, steel wool or any abrasive products should not be used.
