

Virtually Indestructible 2(AA) LED Flashlight ROVDIY2AA1

Reliable light in a durable package. This Virtually Indestructible Flashlight shines with powerful LEDs and an aluminum body that can survive a 30-foot drop. This compact, durable light gives clear and consistent edge-to-edge brightness that is capable of illuminating a defined area. Perfectly sized, the flashlight can be taken along when you go on hikes and other adventures. This light is engineered for survival and emergency applications making it great for intricate jobs and projects around your home. IP67 waterproof and dust proof, protecting components even when surrounded by a cloud of dust for up to 3 hours.

Design Benefits
