

JST-XH Extension Cable – 2.5mm Pitch – 500mm long

Product ID: 5497

Description

We now have a handy extension cord for JST-XH projects! One end has a JST-XH socket, and the other has a matching plug. Between the two, 500mm of color-coded wire.

This solid 2.5mm pitch connector extension cable is great when you need something that can carry a couple amps of current, easy to connect and disconnect, and is just-about 0.1" pitch compatible. The two friction lock for easy-breezy connections whenever you need light and small connectivity.

[We carry a few different pin configurations for JST XH cables and connectors.](#)
