

DVI-D to VGA Active Adapter Converter Cable, 1920x1200, 6-in. (15.24 cm), TAA

MODEL NUMBER: P120-06N-ACT

Convert a DVI digital signal to VGA analog to provide compatibility between a VGA monitor and a computer with DVI-D output.

Features

Active Adapter Makes a DVI Video Source Compatible with Your VGA Monitor This active DVI-D to VGA converter cable makes it possible to send a DVI-D digital signal from your computer or other source device to a VGA analog monitor. Connect the built-in 6-in. (15.2 cm) cable with DVI-D single-link male connector to the DVI port on your video source device. Then, connect a VGA cable, such as a P502-series VGA cable, from your monitor to the converter. The converter supports VGA cables up to 100-ft. (30.5 m), providing flexibility in device placement.

Save Money without Sacrificing Image Quality

This DVI-D to VGA active adapter helps you save money by making your current VGA monitor compatible with a computer or other source device equipped with a DVI output. It supports computer video resolutions up to 1920 x 1200 and HD resolutions up to 1920 x 1080 (1080p). Active digital-to-analog circuitry and quality manufacturing ensure a clean, consistent video signal.

Simplify Installation with a Plug-and-Play SolutionCompletely plug and play, this DVI-D to VGA active adapter does not require software or drivers. The DVI-D cable is built-in, so the only cable you need to supply is your device's VGA cable. If your application requires power, use the included USB Micro-B cable to connect the converter to a USB port on your monitor or a USB wall outlet.

3-Year WarrantyThe P120-06N-ACT is backed by a 3-year warranty, ensuring reliability and performance.

Specifications

OVERVIEW	
UPC Code	037332184832
Product Type	Video Adapter
Technology	DVI; VGA/SVGA

Highlights

- Converts a DVI-D digital signal to a VGA analog signal for greater device compatibility
- Supports computer resolutions up to 1920 x 1200 and HD up to 1080p for high-quality images
- Features plug-and-play installation; does not require software or drivers
- Works with VGA cables up to 100-ft. (30.5 m) for flexibility in monitor placement
- Includes a USB Micro-B cable if power is needed

Applications

- Use your current VGA monitor with your newer DVI computer to eliminate the need for a new display
- Use a VGA projector with your DVI computer to give a presentation

System Requirements

- · A computer with DVI-D output
- A monitor or projector with VGA input

Package Includes

- DVI-D to VGA Active Adapter Converter Cable, 6 in.
- USB to USB Micro-B Cable, 3-ft. (0.91 m)
- Quick Start Guide
