

Specification Sheet

Part Number: IT18R2C2

Identification plate feature allows bundles to be easily marked and identified.

Wire and cable harnesses can be secured and identified using just one product, which saves time.

Plates can be marked manually with a permanent marker or with a pre-printed adhesive label.

Identification Tie, 3.9" Long, 18lb Tensile Strength, PA66, Red, 100/pkg

| Product Description | Identification Cable Ties feature an identification plate that allows wire and cable bundles to be easily marked and identified. These ties enable wire and cables to be secured and identified using just one product, saving installation time. The plates can be marked using a permanent marker or with a HellermannTyton adhesive label. |
| Short Description   | Identification Tie, 3.9" Long, 18lb Tensile Strength, PA66, Red, 100/pkg                                                                                                                                                                                                                                                                      |
| Global Part Name    | IT18R-PA66-RD                                                                                                                                                                                                                                                                                                                                 |

|                                     |                    |
|-------------------------------------|--------------------|
| Minimum Tensile Strength (Imperial) | 18                 |
| Minimum Tensile Strength (Metric)   | 80                 |
