

Type GF-P (braided conduit)

PRODUCT INFORMATION

The GF-P braided conduits are made of specially modified polyester. With this material and the special braiding, the conduit is extremely durable and elastic in both the radial and axial directions. It can be used to bundle and protect a large number of cables and individual wires of all types. The elastic braiding means that configuration of the conduit can be very variable.

Additional advantages of the GF-P braided conduit include:

- Very good mechanical and thermal resistance
- Good chemical resistance
- Very low levels of smoke gas
- Very high abrasion resistance

Specification:
EN 45545-2 3x HL3

SPECIFICATIONS

	-55 – 150 °C, short term 175 °C	
	Modified polyester	
	Self-extinguishing V2 According to UL94
