Product Features

- Page based Flash management with durabit™ technology for increased endurance & random performance
- Optimized FW algorithms especially for high read access and long data retention applications
  - Proven power fail management for highest reliability
  - Near Miss ECC technology
    Minimize the risk of uncorrectable bit failure over the product life time. Each read command analyzes the ECC margin level and refreshes data if necessary.
  - Read Disturb Management
    The read commands are monitored and the content is refreshed when critical levels have occurred.
  - Wear Leveling technology
  - Data Care Management
    The interruptible background process controls the user data for read disturb effects or high temperature related retention degradation and refreshes data if necessary.
- Detailed S.M.A.R.T. support and extended vendor information
- LED for operation indication
- In-field firmware update
- 30 µinch gold-plated USB 3.0 Type-A connector contacts
- Swissbit Life Time Monitoring (SBLTM) tool and SDK for SBLTM (on request)
- Customized options like removable or fixed drive configuration, customer specified strings and IDs, FAT16, FAT32 or customer file system, preload service or customized logo on request
