## **Dual Common Emitter High Speed IGBT4 Power Module**

#### **Product Overview**

The MSCGLQ50DU120CTBL1NG device is a 1200 V, 50 A dual common emitter high speed IGBT4 power module.

All ratings at  $T_J = 25$ °C, unless otherwise specified.

Caution: These devices are sensitive to electrostatic discharge. Proper handling procedures must be followed.

#### **Features**

The following are the key features of MSCGLQ50DU120CTBL1NG device:

- · High speed IGBT4
  - Low voltage drop
  - Low leakage current
  - Low switching losses
- · SiC Schottky Diode
  - Zero reverse recovery
  - Zero forward recovery
  - Temperature independent switching behavior
  - Positive temperature coefficient on V<sub>F</sub>
- · Ultra-low weight and profile
- Kelvin emitter for easy drive
- Si<sub>3</sub>N<sub>4</sub> substrate with thick copper for improved thermal performance
- · Internal thermistor for temperature monitoring
- Extended temperature range

#### **Benefits**

The following are the benefits of MSCGLQ50DU120CTBL1NG device:

- High efficiency converter
- Outstanding performance at high frequency operation
- Direct mounting to heatsink (isolated package)
- Low junction-to-heatsink thermal resistance
- Low profile
- RoHS compliant
- Solderable terminals both for power and signal for easy PCB mounting
- Very integrated power conversion system

### **Application**

The following are the applications of MSCGLQ50DU120CTBL1NG device:

- · High reliability power systems
- AC switches

## 1. Electrical Specifications

This section provides the electrical specifications of MSCGLQ50DU120CTBL1NG device.

### 1.1 IGBT4 Characteristics (Per IGBT)

The following table lists the absolute maximum ratings of MSCGLQ50DU120CTBL1NG device.

**Table 1-1. Absolute Maximum Ratings** 

Symbol	Parameter	Parameter		Unit
V <sub>CES</sub>	Collector-Emitter voltage	Collector-Emitter voltage		V
I <sub>C</sub>	Continuous collector current	T <sub>H</sub> = 25°C	110	А

### The Microchip Website

Microchip provides online support via our website at <a href="www.microchip.com/">www.microchip.com/</a>. This website is used to make files and information easily available to customers. Some of the content available includes:

- Product Support Data sheets and errata, application notes and sample programs, design resources, user's
  guides and hardware support documents, latest software releases and archived software
- General Technical Support Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip design partner program member listing
- Business of Microchip Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

#### **Product Change Notification Service**

Microchip's product change notification service helps keep customers current on Microchip products. Subscribers will receive email notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, go to www.microchip.com/pcn and follow the registration instructions.

### **Customer Support**

Users of Microchip products can receive assistance through several channels:

- · Distributor or Representative
- · Local Sales Office
- Embedded Solutions Engineer (ESE)
- Technical Support

Customers should contact their distributor, representative or ESE for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in this document.

Technical support is available through the website at: www.microchip.com/support

## Microchip Devices Code Protection Feature

Note the following details of the code protection feature on Microchip devices:

- · Microchip products meet the specifications contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is secure when used in the intended manner and under normal
  conditions.
- There are dishonest and possibly illegal methods being used in attempts to breach the code protection features
  of the Microchip devices. We believe that these methods require using the Microchip products in a manner
  outside the operating specifications contained in Microchip's Data Sheets. Attempts to breach these code
  protection features, most likely, cannot be accomplished without violating Microchip's intellectual property rights.
- Microchip is willing to work with any customer who is concerned about the integrity of its code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of its code. Code protection does not mean that we are guaranteeing the product is "unbreakable." Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.
