Description

The N250-024-LP Cat6 Feed-Through Low-Profile Patch Panel makes cable patching quick and easy by simply plugging Cat6 Ethernet cables into either side of the Cat6 couplers. Ninety-degree angles on the couplers allows for low-profile mounting to a wall with included stand-off brackets. Cables feed into the front of the panel, and corresponding Ethernet cables exit Up, Down, Left or Right, depending on the mounting position. Patented printed circuit board design within the coupler exceeds NEXT requirements for Cat6 component testing, assuring Gigabit+ speeds.
