Description

Preloaded Fiber Panel, 1U - 4x (12F MTP/MPO-APC to 4x LC Duplex F/M) 8F Trunk Cables, OS2 Singlemode, 10 m (32.8 ft.)

Features

1U Panel Solution Comes with Cabling Preloaded to Cut Costs and Save Time

All necessary cabling is included with this preloaded fiber panel, coiled inside and ready for immediate use. The aluminum 1U chassis features four 8-fiber MTP/MPO-APC to LC Duplex singlemode trunk cables, all 10 meters (32.8 feet) in length to make management easy. The panel opens to provide easy access to stored cables. Use only as much cabling as you need. The remainder stores inside the chassis to eliminate cable clutter, allow better airflow through the rack and make equipment maintenance and replacement easier. The cables and panels have labels to help with organization. You also avoid the expense and effort of custom cabling. The flexibility in cable length lets you reuse the cables if equipment is moved. The N48S-4M8L4-10 mounts in just 1U of space in an EIA-standard 19-inch rack.
