

Shrouded Servo to Alligator Clip Cable - 17cm long

Product ID: 5514

Description

Stretch out your servo connections with this flexible servo to alligator clip cable. It has a 3-pin shrouded "male" connection to plug your servo into and then, 17cm later, three alligator clips - it even keeps the common red/black/white color coding for power/ground/signal as you'd expect!

This cable is perfect for connecting a servo to something with clip-pads like a [Circuit Playground](#) or [micro:bit](#), or maybe for prototyping / power monitoring from a benchtop supply.

A great add-on for [all the servos we carry](#).

Technical Details

- Cable Dimensions: 17cm / ~6.7"
- 26AWG wires
