

9300P-OEM Particle Counter

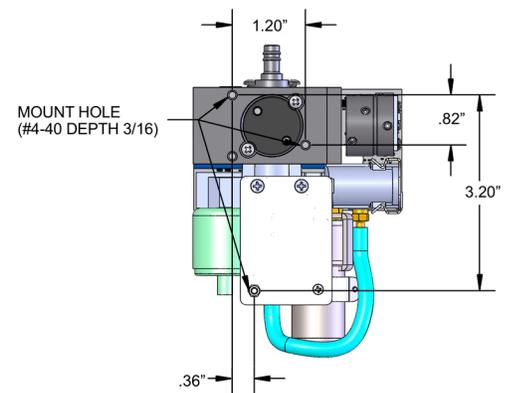

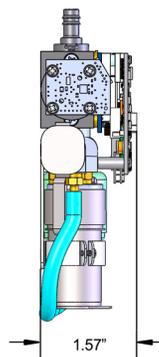

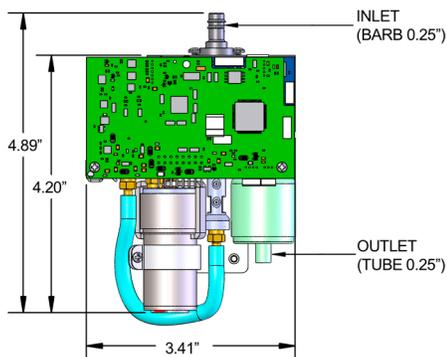

The 9300P-OEM measures up to 30 channels of particle count data from 0.3 to 25.0 μm with a flow rate of 1.2 LPM. The assembly is mounted on a plate for ease of integration. The unit includes a particle sensor, particle counter board, integrated vacuum pump and manifold with pre/post filters, real-time clock/calendar with battery backup, logging and data storage for up to 65,000 sample records, communicates via UART and operates from 7-15 VCD.

All Particles Plus counters meet ISO 21501-4 and JIS B9921. The 9300P-OEM ensures compliance with an on-board pulse height analyzer.
