

Model No.: RDS1021

Website link: <http://lilliputweb.net/rds1021.html>

Product Features

- 25MHz bandwidth
- 100MS/s sample rate
- 5K record length
- FFT function
- Human engineering design
- Multi- action mode via creative trackball
- Multi- trigger option: edge, slope, and pulse
- 5mV micro signals supported
- Easy portability, pocket accommodated

Product description

OWON RDS1021 & RDS1021I are super mini virtual oscilloscopes. With 25MHz bandwidth, 100MS/s Sample rate, 5K record length, the tiny cute pen-type oscilloscope are widely accepted by many hobbies and students. It has human engineering design, support basic function, and some advanced functions such as FFT and different trigger types. It is easy to carry out and connect with PC via USB cable, with friendly user interface on computer, quite good !

Package:

- Grounding clamp (1pc)
- Protection cover (1pc)
- Quick Guide (1pc)
- USB Cable (1pc)
- USB Flash disk (1pc)

Dimension: 150x20x18mm

Weight: 0.27kg
