

C Series Digital Input and Counter/Timer Modules

NI 9401, NI 9411, NI 942x, NI 9435 **NEW!**

- High- and low-speed 24 V logic (IEC 1131-2), 5 V/TTL, differential/single-ended inputs, or universal AC/DC inputs up to 250 VAC/VDC
- Isolation up to 2,300 V_{rms} (withstand), up to 250 V_{rms} (continuous)
- Channel-to-channel isolation up to 1,390 V_{rms} (withstand), up to 250 V_{rms} (continuous)
- Up to 100 ns input rate for ultrahigh-speed digital communication
- Up to 500 ns input rate for high-speed control or long-distance digital communication
- Internal current limiting and industrial logic thresholds for direct connection to a wide array of industrial switches, encoders, and transducers

Product	Compatibility		Logic	Channels	Source/Sink	I/O Delay Time	Signal Levels	Isolation	Connector Options
	CompactRIO	NI CompactDAQ							
NI 9401	✓	✓	5 V/TTL	8	Sink/Source	100 ns	5 V	✓	D-Sub
NI 9411	✓	✓	Differential or 5 V/TTL	6	—	500 ns	±5 to ±24 V	✓	D-Sub
NI 9421	✓	✓	24 V	8	Sink	100 µs	24 V	✓	Screw Terminal, D-Sub
NI 9422	✓	✓	24 V	8	Sink/Source	250 µs	Up to 60 V	✓ (ch-to-ch)	Screw Terminal
NI 9423	✓	✓	24 V	8	Sink	1 µs	24 V	✓	Screw Terminal
NI 9425	✓	✓	24 V	32	Sink	7 µs	24 V	✓	D-Sub
NI 9435	✓	✓	Universal	4	Sink/Source	3 ms	±5 to 250 VDC, 10 to 250 VAC	✓	Screw Terminal

Table 1. C Series Digital Input and Counter/Timer Module Selection Guide

Overview

High-performance digital input switching modules for National Instruments CompactRIO embedded systems, R Series expansion chassis, and NI CompactDAQ provide industrial logic levels for direct connection to a wide array of industrial automotive switches and transducers. Each module features an integrated connector junction box with screw terminal or cable options for flexible and low-cost signal wiring. All modules feature the NI CompactRIO Extreme Industrial Certifications and Ratings.

System Compatibility

You can use NI C Series modules in multiple system types depending on available software. See Table 1 for CompactRIO and NI CompactDAQ module compatibility because not all modules work with both systems. Many of the advanced features described apply only to reconfigurable I/O systems and not to NI CompactDAQ.

Advanced Features

When used in CompactRIO, C Series digital input modules connect directly to reconfigurable I/O (RIO) FPGA hardware to create high-performance embedded systems. The reconfigurable FPGA hardware within CompactRIO provides a variety of options for timing, triggering, synchronization, change detection, digital pattern matching, or digital communication. For instance, with CompactRIO you can implement a circuit to detect digital events and record a timestamp, implement high-reliability digital control logic

in silicon, or perform redundant safety enforcement and interlocks. Unlike traditional digital control devices, the performance of a CompactRIO digital control system does not decrease as the amount of digital logic increases because of the parallel nature of the RIO FPGA circuitry.

Key Features

- High-performance digital and counter/timer input modules for CompactRIO embedded system, R Series expansion chassis, or NI CompactDAQ system
- Screw terminal, D-Sub, strain relief, high-voltage cable, solder-cup backshell, and other connectivity options
- NI CompactRIO Extreme Industrial Certifications and Ratings
- NI 9411 module that generates regulated 5 V power for quadrature encoder or other devices
- Channel-to-earth ground double-isolation barrier for safety and noise immunity and channel-to-channel isolation

Visit ni.com/compactrio or ni.com/compactdaq for up-to-date information on module availability, example programs, application notes, and other developer tools.

C Series Module Accessories

Connectivity Accessories

CompactRIO and NI CompactDAQ systems are designed to provide flexible options for low-cost field wiring and cabling. Most C Series modules have a unique connector block option to provide secure and safe connections to your CompactRIO or NI CompactDAQ system. The table below contains all of the connector blocks available for C Series I/O modules.

Accessory	Description
NI 9932	10-position strain relief and high-voltage screw-terminal connector kit
NI 9933	37-pin D-Sub connector kit with strain relief and D-Sub shell
NI 9934	25-pin D-Sub connector kit with strain relief and D-Sub shell
NI 9935	15-pin D-Sub connector kit with strain relief and D-Sub shell
NI 9936	10-position screw-terminal plugs (quantity 10)
NI 9939	16-position strain relief and high-voltage screw-terminal connector kit

Note: To meet shock and vibration requirements, you must affix ferrules to the ends of the wires on all screw-terminal connectors.

The table below lists the recommended connector block accessories for each CompactRIO digital input and counter/timer module.

C Series Digital Input and Counter Module	Recommended Module Accessory
NI 9401	NI 9934 ¹
NI 9411	NI 9935 ²
NI 9421	NI 9932, NI 9936
NI 9421 with D-Sub	NI 9934 ¹
NI 9422	NI 9939
NI 9423	NI 9932, NI 9936
NI 9425	NI 9933 ³
NI 9435	NI 9932, NI 9936

¹Requires a 25-pin D-Sub connector such as the NI 9934 accessory kit.

²Requires a 15-pin D-Sub connector such as the NI 9935 accessory kit.

³Requires a 37-pin D-Sub connector such as the NI 9933 accessory kit.

The NI 9932 kit provides strain relief and operator protection from high-voltage signals for any 10-position screw-terminal module.

Figure 1. NI 9932 10-Position Strain Relief and High-Voltage Screw-Terminal Connector Kit

The NI 9933 includes a screw-terminal connector with strain relief as well as a D-Sub solder-cup backshell for creating custom cable assemblies for any module with a 37-pin D-Sub connector.

Figure 2. NI 9933 37-Pin D-Sub Connector Kit with Strain Relief and D-Sub Shell

The NI 9934 includes a screw-terminal connector with strain relief as well as a D-Sub solder-cup backshell for creating custom cable assemblies for any module with a 25-pin D-Sub connector.

Figure 3. NI 9934 25-Pin D-Sub Connector Kit with Strain Relief and D-Sub Shell

The NI 9935 includes a screw-terminal connector with strain relief as well as a D-Sub solder-cup backshell for creating custom cable assemblies for any module with a 15-pin D-Sub connector.

Figure 4. NI 9935 15-Pin D-Sub Connector Kit with Strain Relief and D-Sub Shell

The NI 9936 consists of 10-position screw-terminal plugs for any 10-position screw-terminal module.

Figure 5. NI 9936 10-Position Screw-Terminal Plugs

Visit ni.com/compactrio or ni.com/compactdaq for up-to-date information on availability of accessories.

Safety and Compliance

Safety

This product is designed to meet the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CAN/CSA-C22.2 No. 61010-1

Note: For UL and other safety certifications, refer to the product label or visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Electromagnetic Compatibility

This product is designed to meet the requirements of the following standards of EMC for electrical equipment for measurement, control, and laboratory use:

- EN 61326 EMC requirements; Industrial Immunity
- EN 55011 Emissions; Group 1, Class A
- CE, C-Tick, ICES, and FCC Part 15 Emissions; Class A

Note: For EMC compliance, operate this device according to product documentation.

CE Compliance

This product meets the essential requirements of applicable European Directives, as amended for CE marking, as follows:

- 73/23/EEC; Low-Voltage Directive (safety)
- 89/336/EEC; Electromagnetic Compatibility Directive (EMC)

Note: Refer to the Declaration of Conformity (DoC) for this product for any additional regulatory compliance information. To obtain the DoC for this product, visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Waste Electrical and Electronic Equipment (WEEE)

EU Customers: At the end of their life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers and National Instruments WEEE initiatives, visit ni.com/environment/weee.htm.

BUY ONLINE at ni.com or CALL 800 813 3693 (U.S.)

NI Services and Support

NI has the services and support to meet your needs around the globe and through the application life cycle — from planning and development through deployment and ongoing maintenance. We offer services and service levels to meet customer requirements in research, design, validation, and manufacturing. Visit ni.com/services.

Training and Certification

NI training is the fastest, most certain route to productivity with our products. NI training can shorten your learning curve, save development time, and reduce maintenance costs over the application life cycle. We schedule instructor-led courses in cities worldwide, or we can hold a course at your facility. We also offer a professional certification program that identifies individuals who have high levels of skill and knowledge on using NI products. Visit ni.com/training.

Professional Services

Our Professional Services Team is comprised of NI applications engineers, NI Consulting Services, and a worldwide National Instruments Alliance Partner program of more than 600 independent consultants and

integrators. Services range from start-up assistance to turnkey system integration.

Visit ni.com/alliance.

OEM Support

We offer design-in consulting and product integration assistance if you want to use our products for OEM applications. For information about special pricing and services for OEM customers, visit ni.com/oem.

Local Sales and Technical Support

In offices worldwide, our staff is local to the country, giving you access to engineers who speak your language. NI delivers industry-leading technical support through online knowledge bases, our applications engineers, and access to 14,000 measurement and automation professionals within NI Developer Exchange forums. Find immediate answers to your questions at ni.com/support.

We also offer service programs that provide automatic upgrades to your application development environment and higher levels of technical support. Visit ni.com/ssp.

Hardware Services

NI Factory Installation Services

NI Factory Installation Services (FIS) is the fastest and easiest way to use your PXI or PXI/SCXI combination systems right out of the box. Trained NI technicians install the software and hardware and configure the system to your specifications. NI extends the standard warranty by one year on hardware components (controllers, chassis, modules) purchased with FIS. To use FIS, simply configure your system online with ni.com/pxiadvisor.

Calibration Services

NI recognizes the need to maintain properly calibrated devices for high-accuracy measurements. We provide manual calibration procedures, services to recalibrate your products, and automated calibration software specifically designed for use by metrology laboratories. Visit ni.com/calibration.

Repair and Extended Warranty

NI provides complete repair services for our products. Express repair and advance replacement services are also available. We offer extended warranties to help you meet project life-cycle requirements. Visit ni.com/services.
