

CL8800 230VAC LED Driver Evaluation Board

Part Number: ADM00866

Summary

The CL8800 230VAC LED Driver Evaluation Board is a complete solution consisting of an LED Driver (ADM00866) and an LED Load Board (ADM00861) powered directly from the 230VAC line and based on Microchip Technology's CL8800 Sequential Linear Driver.

Package Contents

1 x CL8800 230VAC LED Driver Evaluation Board

Product Features

The CL8800 LED Driver Evaluation Board (ADM00866) has the following features:

- * Input Voltage: 230 Vrms +/-15%, 50/60 Hz
- * Typical Output Capability: up to 130mA
- * Efficiency: Over 85%
- * Max Output Power: 8.5W (depends on the cooling provided)
