

## Handheld UV LED Spot Curing Lamp

The SkyWand is a high-powered, handheld UV LED spot curing lamp designed for products responsive to 405nm UV light. It uses advanced LED technology for immediate on/off functionality and consistent UV output, with a focused spectral output that minimizes IR and reduces heating of assemblies. Powered by a rechargeable Li-ion battery for up to 2 hours of operation, it features an easy on/off switch at the head and comes with six optical lens models, making it versatile for various UV glue curing applications.

**Heat Dissipation:** Mechanical Cooling

**Weight:** 130g (with battery)

**Power Supply:** 1x Rechargeable Li-ion Battery

**Running Time:** Approx. 2 Hours

**Wavelength:** 405nm

**Dimensions:** 146mm x 25mm

**UV Light Spot Size:** 15mm

**Focus Distance:** 28mm

**UV Intensity:** 0.9 W/cm
