

# 1.4kW 120V Single-Phase Basic PDU - 16 NEMA 5-15R Outlets, 5-15P Input, 15 ft. Cord, 48 in. 0U Rack

# MODEL NUMBER: PDUV15-48

Delivers 120V single-phase AC power to multiple loads from a utility outlet, generator or UPS system in a data center or network closet.

# Features

### Single-Phase 120V PDU Distributes Network-Grade Power to Multiple Loads

This basic rack PDU (rPDU) is an ideal no-frills unit for networking, telecom, security, audio/video and sound reinforcement applications. Recommended for small to mid-sized data centers, computer rooms and network closets, the PDUV15-48 features 16 NEMA 5-15R outlets for connecting equipment. A 15-foot cord with 5-15P input plug connects to your facility's AC power source, generator or protected UPS system to distribute power to connected loads.

#### Up-to-Date Safety Features Protect Your Vital Equipment

A lighted on/off switch is protected by a transparent plastic cover to help prevent an accidental shutdown that could lead to costly downtime. A 15A circuit breaker protects connected components from dangerous overloads.

#### Versatile Installation Options Give You Plenty of Choices

The 48-inch 0U PDU mounts vertically in an EIA-standard 19-inch rack using the included toolless mounting buttons or the included mounting clips and hardware. You may also use the clips to secure the PDU to a wall, counter or other flat, secure surface.
