

SmartOnline 6000VA 5400W 208V Online Double-Conversion UPS - 2 L6-20R and 2 L6-30R Outlets, L6-30P Input, Network Card Included, Extended Run, 3U Rack/Tower

MODEL NUMBER: SU6000RT

Provides sine wave output, complete battery backup and power protection for mission-critical IT installations, edge networks and other advanced network applications.

Features

6kVA/5.4kW/208V Battery Backup for IT Installations and Edge Networks

This SmartOnline® rack-mount online double-conversion UPS system provides uninterrupted battery backup and AC power protection against blackouts, brownouts, surges and line noise that can damage valuable IT equipment or destroy data. The SU6000RT provides reliable power management for education, commercial, financial or healthcare networking components, including Cisco switches and servers.

Expandable Internal Battery Backup Keeps You Operational Through Power Outages

The field-replaceable, hot-swappable valve regulated lead acid (VRLA) battery modules allow you to work through short power failures and give you enough time to safely save files and shut down your system in case of a prolonged blackout. Automatic restart after power outages reduces costly on-site visits. You can also connect up to four extended battery modules (BP180RT, sold separately) for hours of extended runtime.

Pre-Installed Network Interface Offers 24/7 Remote Access

The WEBCARDLXE network interface turns the SU6000RT into a managed device on your network. It enables full remote configuration and SNMP-based UPS management, including load shedding, safe shutdowns and automated alerts. The IP-based Auto Probe feature ensures continuous network uptime by communicating with other network devices, detecting lost connectivity and automatically rebooting IT equipment without an on-site visit. Optional EnviroSense2 modules (E2MT, E2MTDO and E2MTHDI, all sold separately) provide a variety of environmental monitoring and control options.

NEMA Outlets Protect Your Connected Components

Two L6-20R and two L6-30R managed outlets provide connected equipment with pure sine wave AC output and allow you to manage power consumption down to the outlet group level. Power provided by these outlets is filtered to protect connected equipment against damaging surges and line noise. The SU6000RT also supports hardwired output.

Intuitive LCD Interface Keeps You Informed at a Glance

The menu-driven LCD provides control settings and critical information to help diagnose any issues, including alarm and fault notifications. The interface rotates to accommodate both rack-mount and tower

Highlights

- Protects equipment against blackouts, brownouts, transient surges and line noise
- Keeps equipment running during outages to allow time for file saves and safe shutdown
- Pre-installed WEBCARDLXE network card enables full remote access and control
- Interactive LCD interface keeps you updated on critical load information in real time
- Optional extended battery modules allow extended runtime to keep equipment powered

Package Includes

- 6000VA 5400W 208V Double-Conversion UPS
- WEBCARDLXE network card
- USB cable
- RS-232 cable
- Tower support stands
- Cable gland for hardwire connection
- Rack-mounting hardware (9RK)
- Quick start guide

configurations, and it tilts up to 45 degrees for more comfortable viewing.

Advanced Communications Ports Allow for Automatic Saves and Shutdowns

RS-232 and USB ports connect to a serial-enabled device for a variety of communication options (cables are included). A dry-contact relay port can be programmed through the LCD to provide reliable communications to automation and industrial components. The RPO/ROO connectors permit emergency shutdown or remote restart of all connected equipment.

Versatile Installation Options

You can mount the SU6000RT in just 3U of space in an EIA-standard 19-inch rack using the included 4post rail kit or an optional 2-post rail kit (RK2PC, sold separately). You can also adapt it for tower installation using the included support stands. The 10-foot power cord with NEMA L6-30P plug connects to a compatible AC outlet. A cable gland is included for alternate hardwire input.

Specifications

| OVERVIEW | | |
|------------------------------------|----------------------------------------------------------------------------|--|
| UPC Code | 786689811730 | |
| UPS Type | On-Line | |
| INPUT | | |
| Input Phase | Single-Phase | |
| Rated input current (Maximum Load) | 24.8A | |
| Nominal Input Voltage(s) Supported | 200V AC; 208V AC; 220V AC; 230V AC; 240V AC | |
| Nominal Input Voltage Description | Factory configured to 208V | |
| UPS Input Connection Type | Hardwire; L6-30P | |
| Input Circuit Breakers | Recommended 30A upstream | |
| UPS Input Cord Length (ft.) | 10 | |
| UPS Input Cord Length (m) | 3.1 | |
| Recommended Electrical Service | 30A | |
| Maximum Input Amps | 25 | |
| Input Plug Type | NEMA L6-30P | |
| Total Harmonic Distortion | < 2% THDV on linear load; < 5% THDV on non-linear load | |
| Input Cord Length (ft.) | 10 | |
| Input Cord Length (m) | 3.05 | |
| OUTPUT | | |
| Output Capacity (VA) | 6000 | |
| Output Capacity (kVA) | 6 | |
| Output Capacity (Watts) | 5400 | |
| Output Capacity (kW) | 5.4 | |
| Output Capacity Details | 230/240V: 5400 watts; 220V: 5100 watts; 208V: 4800 watts; 200V: 4600 watts | |
