

## 6-Outlet Surge Protector w/2 USB-A (4.8A Shared) & 1 USB-C (3A) - 8 ft. (2.43 m) Cord, 1080 Joules, Desk Clamp

MODEL NUMBER: TLP648USBC

6-outlet desk-clamp surge protector safeguards your home/office electronics against dangerous surges, spikes and line noise.

### Features

**6-Outlet Surge Protector with USB Safeguards Your Sensitive Electronics** Ideal for your home or office workstation, this Protect It!® 6-outlet surge protector features a surge protection rating of 1080 joules to defend your sensitive electronic components against even the strongest power surges and spikes. Because residential power outlets have three wires—hot line (H), neutral (N) and ground (G)—the TLP648USBC protects all three, covering the two protection modes: full normal mode (H-N) and common mode (N-G/H-G).

**Spring-Loaded Desk Clamp Protects Equipment at Any Workstation** This portable surge protector features a spring-loaded clamp that attaches to any flat, smooth surface up to 2.5 inches thick, so you can take it with you to the office, dorm, conference room, hotel or anywhere else you need to plug in your electronic devices. The eight-foot power cord with NEMA 5-15P plug pivots 90 degrees to accommodate installation to a horizontal or vertical surface.

**NEMA 5-15R Outlets Accept a Wide Range of Electronic Devices** Plug your computer, printer, wireless router, desk lamp or other home/office electronics into six NEMA 5-15R outlets to protect them against dangerous surges, spikes and line noise.

**3 USB Ports for Charging Mobile Devices** This surge protector with 3 USB ports is ideal for keeping your devices at full capacity. Two USB-A ports 2.4 amps each for charging your smartphone, tablet and other USB mobile devices, which are also protected from the damaging effects of surges, spikes and line interference. In addition to the dual USB-A ports, a 3-amp USB-C port charges devices quickly and safely.

**Premium Protection from EMI/RFI Line Noise Helps Your Equipment Perform Better** Various electromagnetic and radio sources found in virtually every home and business can cause disruptive interference on the AC line. Known as EMI (electromagnetic interference) and RFI (radio frequency interference), this line noise is a common cause of performance problems. This surge protector filters out disruptive line noise that can disturb your electronics and inflict hardware damage or data loss. This EMI/RFI filtering also helps your connected components perform better and last longer.

**Includes the Latest Safety Features** The integrated circuit breaker in the on/off switch provides one-touch control over connected equipment. Automatic shutoff permanently cuts power to outlets if protection circuit is incapacitated, preventing equipment damage and indicating replacement is required. A green

### Highlights
