

9510

One-Part Epoxy Potting Compound

9510 is a black, rigid, one-part epoxy potting compound. It is a heat cure epoxy that provides unlimited working time at room temperature and does not require frozen storage.

Our 1-part epoxy resin provides exceptional chemical resistance against a wide variety of mild to harsh chemicals, including toluene, acetone and ethyl acetate. It also provides excellent electrical insulation and protects against static discharge, vibration, thermal shock, environmental humidity, salt water, fungus, and many harsh chemicals.

Features & Benefits

Minimum cure temperature of 80 °C

Ready to dispense—no mixing is required

Low viscosity of 4 800 cP

Excellent chemical resistance

Excellent adhesion to a wide variety of substrates, including metals, composites, glass, ceramics, and many plastics

Extremely high tensile and compressive strength

Solvent-free

Application Instructions

Read the product SDS and Application Guide for more detailed instructions before using this product.

Recommended Preparation

Clean the substrate with 824 99.9% Isopropyl Alcohol, so the surface is free of oils, dust, and other residues.

Cartridge

1. Twist and remove the cap from the cartridge. Do not discard cap.
2. Dispense the adhesive evenly to both surfaces.
 - a. For 30 mL size, insert the cartridge in the 8DG-30-1 dispensing gun (see Dispensing Accessories Application Guide).
3. To stop the flow, pull back on the plunger.
4. Clean nozzle to prevent contamination and material buildup.
5. Replace the cap on the cartridge.
