

Vividia CX-4010i Joystick Articulating Borescope

The **Vividia CX-4010i Flexible Smartphone Joystick Articulating Inspection Camera Borescope** has a 4mm (0.16") diameter and 1-meter flexible probe length. The probe is covered by a metal-mesh tube for durability and IP67 waterproofing & dust resistance. The CX-4010i has bright LED lights, joystick pivoting and can be used to investigate dark places as a diagnostical inspection camera. The camera head can be steered with the joystick to all directions and all angles. The CX-4010i can be directly connected to an iPhone, iPad or Android device through a USB cable. With the free app "USee" on the Google Play Store & Apple App Store, one can seamlessly record picture and video directly to their device. With a waterproof flexible insertion tube and probe camera, the Vividia CX-4010i borescope is suitable for many applications. These include but are not limited to looking into engine cylinders, inside airplane wings, behind instrumental panels and inside brake systems. It is also particularly useful for diesel applications due to its small diameter. The Vividia CX-4010i is a fantastic diagnostic inspection camera for auto mechanics and technicians.

CX-4010i Tech Specs:

Model:	CX-4010i or CX-4015i
Compatible systems:	iOS 9.0 and above, Android OS 10 above
Camera head diameter:	0.16" / 4.0mm
Camera head bending length:	~ 35mm / 1.38"
Camera sensor resolution:	CMOS, 1280x720
Focus range:	10mm / 0.4" to infinity
FOV:	100 degree
LED lights:	6 white LED lights; 4 levels brightness
Probe length:	1m / 3.3 ft
Probe tube material:	Wear-resistant metal mesh
Articulation type and angles:	Joystick 360 all-around, >180 degree
Waterproof (probe only):	Waterproof IP67
Output:	USB-A out
Battery built-in:	Rechargeable lithium, 2600 mAh
Working time:	>3h after full charge
Dimension (without stand):	195 x 57 x 10 mm
Weight (without stand):	0.3 kg / 0.66 lbs
Special features:	Auto off; articulation angle locking
