

Vividia FC-852plus Mini 8mm 0.315" USB Manual Focus 2MP Semi-Rigid Goose-Neck Inspection Camera Borescope Endoscope Microscope with Maximum Magnification 150x

Vividia 8mm Manual Focus USB Borescope (FC-852plus) is a unique USB borescope with manual focusable functions. It can be used to view objects far away and also to observe objects very close (~2mm distance). One can carefully adjust the focus wheel to get clear images. The image resolution is 1920x1080. The probe head diameter is 8mm and 520mm (20.5") long flexible semi-rigid probe tube. Three screw-on accessories are included in the package: **side-view mirror, magnet, hook**. Ideal for detailed visual inspection in hard-to-reach places.

By connecting the Mini USB Flexible Inspection Camera/Borescope/Endoscope/Microscope to your PC via USB interface, it allows you to perform detailed visual inspection in hard-to-reach places. This inspection camera is powered by a USB connection to your PC, so no batteries are required. The 50cm (1.6ft) flexible cable can be bent into many shapes to fit into unreachable areas. With 2M pixels CMOS sensor, up to 150x magnification, and four built-in LEDs for illumination, this camera allows you to capture snapshots or videos with rich color throughout a large dynamic range. It is easy to take snapshot by hardware button or by software control, and the images can be saved, compared and printed. The mirror attachments (45°) for side view are included in the package. The software which comes with the camera has measurement function for length, arc, and angle. Waterproof camera withstands wet environments. The small 8mm camera head is perfect for up-close visual inspections in small spaces. It is ideal for use in automotive maintenance, electrical repair, plumbing applications, HVAC/R and the visual inspection of otherwise inaccessible areas.

•Technical Details:

- Camera Diameter: 8mm / 0.315"
- Probe length: 50cm / 1.6ft
- Image Resolution: 1920 x 1080 pixel
- Video Resolution: 1920 x 1080 pixels
- Focus: Manual focus
- Focal Range: 0.5cm – infinite (when focal distance is infinity, the borescope/microscope cannot magnify, but can be used as a webcam)
- Magnification: 1X-150X (adjustable)
- Waterproof camera head & cable (handle is NOT waterproof) meet IP66 standard
- Photo Taken: by hardware and by software
- Illumination: 4 white LED lights with adjustable brightness.

- Side view mirror, hook and magnet are screwed on (included)
- Output: USB2.0 for Windows 11/10/8/7/xp, Mac, Android, Chromebook
- USB Cable: 147cm (4.8ft) long with USB 2.0 interface
- 2D Measurement Functions: Measure Length, Arc, Angle
