Safety AND Security

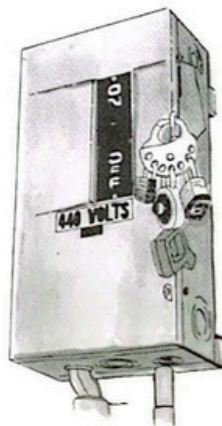

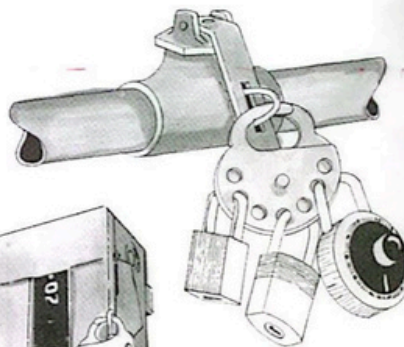

Dayton Machine Products, Inc. lockout systems offer affordable safety and protection that meets OSHA Lockout/Tagout directives.

- Lockouts isolate energy sources to equipment.
- Lockouts disable potentially dangerous equipment during maintenance and repair downtime.
- Lockouts prevent unauthorized distribution of fuels, lubricants and other liquids.
- Lockouts provide durable and dependable safety for your work environment.

Our 7-position lockout is constructed of a heavy-duty, 11 gauge nickel-plated steel. It is the toughest lockout you can buy! Seven holes allow you to use just one lockout no matter the size of the crew. This flexibility saves you money. Also available in a stainless steel model (Item 15185-00) for use in corrosive environments.

Item 15072-00

Use on:
Water
Fuels
Lubricants
Anti-Freeze
Electrical Feed
Compressed Air
Steam

Also Available

Item 15075-00

Our Tagged Multi-Lock allows you to lock-out and tag-out with one convenient, affordable product. Versatile OSHA compatible caution tags can be used with or without pictures for most applications. Durable laminated tag resists water, grease and other substances.

Item 14703-00

Our Pin Lockout prevents unsupervised use of power tools by making connection to a power source impossible. Constructed of 11-gauge nickel-plated steel, lock-out fits any 2, 3 or 4-prong male plug with end holes. Can also be used for deactivating machinery that is not hard-wired.
