

Product End of Life Announcement

End of Life Announced:	2023-03-01
Last Order Date:	2024-03-01
Last Ship Date:	2024-06-01

Balluff designs products to remain continuously available over an extended product lifecycle. Eventually, though, all products reach “End of Life” and must be discontinued. Because of ongoing technical progress, higher-performance successors become state of the art. As a result, existing products are removed from the portfolio. Balluff strives to offer advance notification and expert technical support to help our customers to transition seamlessly to the next product generation.

Alternative products with a comparable range of services

Order code	Part number	Differences (amongst others)
BAE011F	BAE SA-OH-059-YI-DP02	Housing geometry (W x H x L) New generation

Important hints

- Of course, our Technical Support is available to assist in selecting alternative products for existing applications. Please note: Balluff cannot declare that the alternative product is compatible in your particular case. Responsibility for verification of the suitability of the alternative product rests with the buyer.
- Purchase orders placed after the End of Life Announcement Date are non-cancellable and non-returnable.
- The Last Order Date is the last day that new purchase orders can be accepted by Balluff.
- Balluff seeks to execute these orders but is not obligated to do so under all circumstances.
- The Last Ship Date is the last day that Balluff can ship remaining quantities from open purchase orders.
- Please visit www.balluff.com for up-to-date support contact information for your location.

About this EOLA

Balluff practices active Product Lifecycle Management (PLM). The primary goal of Balluff's PLM program is to reduce the risk of unplanned business interruptions to our customers. Within this PLM we inform our customers about the end of life of products and about alternative products with a comparable range of services.
