

30 dB Fixed Attenuator 7/16 Female (Jack) to 7/16 Male (Plug) Directional Up to 6 GHz Rated to 100 Watts, Heatsink Body, 1.45 VSWR

SA6DFDM100W-30

Features

Applications

Description

Fairview Microwave carries a broad selection of fixed attenuators with a wide range of attenuation levels, frequency ranges, and power dissipation ranges. Also known as RF pads, RF microwave attenuators lower the amplitude of a signal (or attenuate) a known amount. These attenuator pads can be used in a wide variety of applications including reducing a signal level to protect measurement equipment or other circuitry, extending the range of power meters and amplifiers, and impedance matching circuits by reducing the VSWR seen by adjacent components. RF attenuators can prevent signal overload in amplifiers, receivers and detectors, adjusting the signal level to a range that is optimal.

Few RF components are as commonly used as fixed coaxial attenuators, and Fairview Microwave carries one of the largest in-stock varieties and ships them same day. The SA6DFDM100W-30 is a 30 dB Fixed Attenuator that operates from DC to 6 GHz and is rated to 100 Watts. The versatile coaxial package uses 7/16 DIN female to 7/16 DIN male connectors. The Black Anodized Aluminum Heatsink body allows for efficient heat dissipation under high power usage conditions.
