

Philips EasySense / SpaceWise Compatible Wireless Switch

ILLUMRA ZBT-S1E and ZBT-S2E European Style Switches are for use with the Philips EVO200, EvoKit, Spacewise DT, SNS120, SNH200, SNS200, SNS210 MC.

ILLUMRA™ ZigBee Euro Switches offer a familiar and convenient interface for controlling Signify EasySense and SpaceWise products. The switches do not require wires or batteries, they contain a micro-generator powered ZigBee transmitter to send a wireless signal. The signal transmits through walls or around corners.

Philips EasySense configuration software is used to configure the behavior and allows the rocker to be configured for On/Off function and also works as press and hold dim to adjust brightness up and down. If using a Dual Rocker switch, the left rocker would perform the on/off and dim functions, and the right side can be configured for Scene Recall - the top and bottom buttons each dim to a level that is adjustable in the configuration software.
