

BNC Male Open Circuit Connector Cap with 4 Inch Chain

Shorts and Caps Technical Data Sheet

M39012/25-0106

Features

- Protects against dust and contaminants
- Protects against physical damage
- Silver Plated Body

Applications

- General Purpose Laboratory Use
- Test and Measurement

Description

Pasternack's M39012/25-0106 connector dust cap has a BNC interface and a male gender. Our BNC male dust cap is a non-shorting design with a silver plated body to ensure durability. The Pasternack non-shorting BNC connector cap is part of over 40,000 RF, microwave and millimeter wave products that ship the same day.

RF connector dust caps are essential for precision connectors, protecting them from dust, corrosion and potential damage especially to test and measurement equipment. Specific RF connector cap models come with a chain to prevent loss or misplacement. Internal short connector cap versions are available to protect equipment from a spike in current caused by electrostatic discharge (ESD).
