

1 Watt RF Load Up to 18 GHz With SMP  
Female Input Gold Plated Brass

RF Terminations Technical Data Sheet

PE6160

**Features**

- DC to 18 GHz Frequency Range
- VSWR 1.2:1 Max
- Max Power 1 Watt (CW)
- SMP Female Coaxial Interface

**Applications**

- Wireless
- Radar Systems
- Commercial and Military Communication
- SatCom
- Test and Measurement

**Description**

Pasternack's PE6160 is an RF termination (also called RF load or dummy load) that operates from DC to 18 GHz and handles up to 1 Watt (CW). Our SMP termination / load has a female gender. PE6160 SMP load termination offers 1.2:1 max VSWR. RF load / terminations are indispensable components in many RF, microwave and millimeter wave systems where signal reflection from unused ports can potentially damage the device or reduce the signal integrity. By using a terminator on an unused port with a matched load (dummy load), the incident energy will be absorbed with minimal reflection. These termination components are commonly used to terminate devices such as couplers, circulators, and switches. They are also widely used in measurement systems to ensure accurate results. Pasternack offers a huge selection of RF, microwave and millimeter wave terminations up to 65 GHz with excellent performance over the entire operating range and power handling capabilities up to 800 Watt (CW).
