Description

Pasternack's PE91577 type N male to type N male miter right angle adapter is part of our full line of RF components available for same-day shipping. Our type N to type N adapter has a male to male gender configuration built of durable stainless steel. PE91577 type N male to type N male adapter operates to 18 GHz. The Pasternack RF adapter provides good VSWR of 1.3:1 maximum. This miter right angle type N to type N adapter allows for easier connections in tight spaces.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
