### Description

N adapter PE91597 from Pasternack Enterprises is part of a very large selection of in-stock interconnect RF components. Our N to N adapter is a coaxial adapter design with a 50 Ohm impedance. This 50 Ohm N adapter is manufactured to precise RF adapter specifications and has a maximum VSWR of 1.200.

Our in-series connection type RF adapter, which operates to 18 GHz makes connections in tight spaces easier. This passivated stainless steel RF adapter can be used to make connections between two connector types that would not otherwise mate. This N adapter contains beryllium copper contacts with gold over nickel contact plating.

This N to N adapter is constructed with male gender on side 1 and female on side 2. PE91597 N male to N female coaxial adapter from Pasternack has a 45-degree angled body ideal for routing RF/Microwave signals in tight spaces. Additionally, RF adapters can be utilized to protect connectors on expensive equipment where the number of connect and disconnect cycles is high.

Pasternack N male to N female adapter is part of over one million RF microwave and millimeter wave components in stock. 45-degree angle RF N adapter is ready for same day purchase and shipping worldwide. We also stock and/or custom build N coaxial cables that ship quickly from our facility for all your RF adapter component needs.
