

N Female to LC Male Adapter

RF Adapters Technical Data Sheet

PE9237

Configuration

- N Female Connector 1
- LC Male Connector 2
- 50 Ohms
- Straight Body Geometry

Features

- N Interface compliant with MIL-STD-348
- LC Interface compliant with MIL-STD-348
- Silver Plated Beryllium Copper Contact
- 200 µin min Silver Contact Plating

Applications

- Allows Connection Between Series
- General Purpose Test

Description

Pasternack's PE9237 type N female to LC male adapter is part of our full line of RF components available for same-day shipping. Our type N to LC adapter has a female to male gender configuration. PE9237 type N female to LC male adapter operates to 1,000 MHz.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
